

Double Face HDPE Sheets

Anticipate outstanding results with our plastic corrugated sheets.

Liberty Plastics sheets are made from our high-density polyethylene (HDPE) laminate board, which is lightweight, strong, versatile, reusable, and weather and chemical resistant. Our HDPE sheets are fabricated using a co-extrusion process that allows three distinct layers of material to come together and form a substrate that is unmatched. Liberty Plastics corrugated plastic is made in the USA with postindustrial recycled material content.

Our numerous product features drive your competitive advantage. So start experiencing the many benefits of HDPE.

Multiple Sheet Size Options

Includes sheets up to 60" wide for a broad selection of sizes

Standard Weight Options

Includes 140 - 500 lb. msf sheets; adds strength and rigidity without adding thickness

Multiple Color & Print Options

Customizes sheets for identification purposes

Inventory Management

Offers inventory management services to support JIT inventory needs

Stock Sheet Program

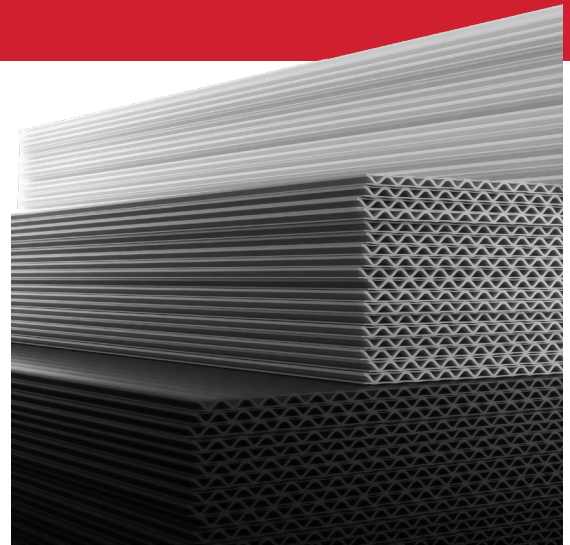

Provides quick turnaround times for stock or custom sheets

Custom Extrusion Program

Extrudes sheets up to 60" in board weights from 140 - 500 lbs

Custom Die Cutting, Color, Print

Offers unique sheet attributes for unique customer applications

Learn the Value of Laminate

Liberty Plastics uses high density polyethylene (HDPE) laminate board.

Our proprietary laminated corrugated substrate maintains service life of over 50 cycles even in the most rigorous applications. A strong performer in any environment, our plastic corrugate survives extreme heat and cold while resisting cracking.

The triple wall laminate design of our substrate resists punctures and surface abrasions and holds superior surface crush properties over polypropylene, yet is still lightweight.

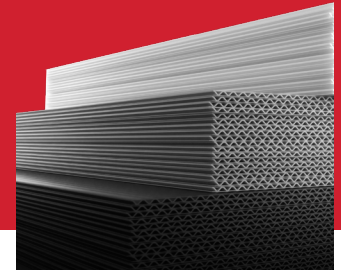

Our high-performance HDPE sheets are a testament to the quality and durability of our recyclable stock solutions. And our service team relentlessly pursues just the right plastic corrugate solution for your unique needs.

Contact us to discuss your particular protection challenges.

Double Face HDPE Sheets

Part #	With Corrugation	Across Corrugation	Color	Board Weight MSF
