

Totes

Trust our plastic corrugated totes to deliver on performance.

Liberty Plastics totes are made from our high-density polyethylene (HDPE) laminate board, which is lightweight, strong, versatile, reusable, and weather and chemical resistant. Our HDPE board is fabricated using a co-extrusion process that allows three distinct layers of material to come together and form a substrate that is unmatched. Diversiplast corrugated plastic is made in the USA with postindustrial recycled material content.

Our numerous product features drive your competitive advantage. So start experiencing the many benefits of HDPE.

Multiple Standard Sizes & Lids

5 standard sizes available; maximizes warehouse space; fits conveyors; protects during transit and storage

Multiple Color & Print Options

Color options include blue, natural, red & black; Identifies parts or products for efficient operations

Nesting Design

Saves warehouse space and handling costs; reduces freight costs

Wire Reinforced

Carries up to 80 lbs. without cracking or breaking; holds shape; easy to carry

Custom Sizes & Color Options

Offers unique tote attributes for unique customer applications; identifies brands or companies

Learn the Value of Laminate

Liberty Plastics uses high density polyethylene (HDPE) laminate board.

Our proprietary laminated corrugated substrate maintains service life of over 50 cycles even in the most rigorous applications. A strong performer in any environment, our plastic corrugate survives extreme heat and cold while resisting cracking.

The triple wall laminate design of our substrate resists punctures and surface abrasions and holds superior surface crush properties over polypropylene, yet is still lightweight.

Our high-performance HDPE totes are a testament to the quality and durability of our recyclable stock solutions. And our service team relentlessly pursues just the right plastic corrugate solution for your unique needs.
